

## Our Environmental Policy

The corporate philosophy of SNBL is, "We are a company that values the environment, life, and people." Environmental conservation is important for a company's sustainable growth. Strongly aware of this, we will contribute to the conservation of the global environment through voluntary efforts to reduce GHG emissions and by considering the impact of our business activities on biodiversity.

1. We obey regulations, laws and ordinances relating to environmental conservation, agreements with stakeholders and our voluntary standards. At the same time, we sympathize with and act according to the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD).
2. We take continuous action to reduce and recycle waste from our business activities and are actively committed to preserving biodiversity.
3. In choosing suppliers, we consider quality, price, ability to meet deadlines, technological development, stable supply and eco-friendliness to be the important criteria in procurement and, as much as possible, encourage eco-friendly green procurement with the minimum environmental impact.
4. We will continuously educate employees so that they will be highly aware of the environment and be capable of independently fulfilling their social responsibility.
5. We will actively disclose information about our environmental activities and fulfill our accountability to society.
